2008

100.000 de euro

2009

100.000 de euro

WORK PORTFOLIO

In the opinion of **ADCA PROIECT GROUP**'s board of directors, regarding our future partners, the most relevant proof of our capability for well completing the design projects we contract, is the work portfolio of the finalized projects, most of which are already implemented and which stand proudly as company achievements.

These were accomplished with a high level of professionalism, assured through the constant development of employee qualification, through the use of software dedicated to the design activity (AutoCAD, Hydra, Canalis, Epanet, specialized programs for lighting calculations, etc.), all of which have the goal to reduce the conception time of the project, to meet the expectations of the client and to fulfil the contract's specifications. Overall, our design activity indicates the company's adaptability to the new requirements and technologies of the installation field.

In the following sections, we shall present the main projects created along the years by ADCA PROIECT GROUP, divided in work categories.
